

Steel Palisade

Steel Palisade gives a physical and visible deterrent against vandalism and intruders. It is manufactured from hot rolled mild steel strip, set vertically and fixed to horizontal cross rails of steel angle from top and bottom. Palisade fencing is easy to assemble and once assembled, offers a security system that is robust, long lasting and easily repairable. All palisade components are supplied hot dip galvanised to give long term weather resistance. Palisade is the best fencing system to use on slope ground.

All steel palisade products are generally supplied hot dip Galvanised to BS729 (superseded by BS EN ISO 1461) to give long term weather resistance. Pales can also be supplied in a plain mild steel finish.

There is an option of a wide range of powder coating RAL colours.

Applications:

- Police stations and Law enforcement areas
- Railway Line/Track Protection
- Motorways and Highway Protection
- Industrial Estates
- Commercial Sites
- Power Stations

Fence Height	Pale Length	Post Length	Post Centre	Angle Rail
1.0m	950mm	1450mm	2750mm	45x45x6
1.2m	1150mm	1650mm	2750mm	45x45x6
1.5m	1450mm	1920mm	2750mm	45x45x6
1.8m	1750mm	2350mm	2750mm	45x45x6
2.0m	1950mm	2590mm	2750mm	45x45x6
2.1m	2050mm	2720mm	2750mm	45x45x6
2.4m	2350mm	3100mm	2750mm	50x50x6
3.0m	2950mm	3700mm	2750mm	50x50x6

Other fence heights and pale thicknesses are available on request. We stock standard sizes in both "W" and "D" profiles.

Use of pointed top pales at heights below 1.8m within any palisade fencing system is not recommended. Alternative pale tops or other fencing systems should be used for these heights.
